Geological Survey

WATER RESOURCES DIVISION

Date 12/4, 1995

MISCELLANEOUS FIELD NOTES

Anderson Creek @ H1

@ 2100

CR10

Field

stage = 1.20

1.10

WT = 0.4

SC = 60.4

Freed probes @ 2110. WT appeared to be OK, SC partially buried, cleared ice from flame, orifice bubbling.

@ 2125:

CR10

Field

stage 1.23

1.10

WT 0.4

-0.6

SC 76.9

65.0

PH

3.8

Qest

0.02

Purged line @ 2140, but failed to lower CR10 reading, probably partly frozen. Left as is.
