WATER RESOURCES DIVISION

Date 11/24, 19 98 1441

MISCELLANEOUS FIELD NOTES

Fl, Canada St.

AB, MG

→ CR10 time OK

→ *6 → stage value is messed up.
*6: -9999

Lots of snow us + DS and in flume.

→ Nice day, breezy, warm

→ We discovered fluid in the pressure transducer line (small clear line from conflow to xducer). We disconnected the line and attempted to clear it. That didn't fix the problem. So, we didn't clear the flume.
