mostly clear
light breeze
temp @ 20C

control looks good/
free of ice and snow, water flowing
freely through.

probes look good, in proper position

	Inside	outside	
Stage	99999	1.31*	@ 1905
WT	8.01	7.8	
SC	153.97	132	PH = 7.95

4.239
- 1.31
2.929

* note: 1.31 is the measured distance from
the top of the probe to the water surface
the top of orifice not to the water surface
measured 0.32

7.131
- 0.32
6.811

N₂ 2000 psi

feed 10 psi

batteries good

* stream chem taken @ 1915

Flume measurement @ 1930 (fair)

upstr 1.7 0.12

downstr 0.1

outside stage 1.31

Q = 0.122
