MISCELLANEOUS FIELD NOTES

House Creek @ H2

PC, CT

- no flow ice in flume
- battery light off on PV adapter  
but batteries OK
- No 1800 psi
- leaving portable flume here in box.

inside                      outside

stage 20.32                      0.0 @ 1108

try to clear flume of ice

inside                      outside @ 1113

stage 1.02                      0.0

seemed to work ok

+ actually some flow but all bypasses  
flume and leaks through control  
on river left

- no stream class taken since taken already  
within last 24 hrs

@ 50.1 L/s
