MISCELLANEOUS FIELD NOTES

Onyx River @ Vada, Wright Valley AB, MG

- 0 psi in N<sub>2</sub> tank
- control looks good, some snow accumulated downstream of weir
- swapped N<sub>2</sub> tank P<sub>high</sub> = 1800 psi, P<sub>low</sub> = 10 psi
- solar panel array regulator light is ON
- batteries are @ 14 V each
- swapped SM (Vanda B in now)
- reset CR10 time to 1136.

\*6: 1.0 ft stage?  
1.9 temp?  
-2264 cond.?  
14.32 ←?

→ NO FLOW yet down here, our flight from midway ~~down~~ up valley showed no flow in the Onyx yet

- beautiful day, calm cool & sunny
